THE NEW APPROACH

TO REVENUE ACCOUNTING

*e*Rev
By Rene Perez & Associates

Rene Perez, over 30 years of expertise in airline automation.

Designed by financial airline operations experts, eRev's integrated revenue accounting system employs the most up-to-date technology in order to focus on prioritizing airline profitability:

Cost-effective solution
- Hands off - all electronic – self-service
- Full automation of the Revenue Accounting process
- Electronic reconciliation with all external peripheral systems

Up-to-the-minute Revenue Performance
- Revenue Recognition: Flight-Passenger-Payment
- Revenue analysis: unearned-earned-projected-expired-breakage
- Statistical revenue: Flight-Route-Fare-FOP
- IET and Weekly Billings
- Post and projected revenue

Automated Controls
- Accommodates Traditional and Low Cost Carrier business rules
- Debit/Credit (balanced) results
- Seamless integrity of the cycle, from PNR through credit vouchers and refunds
- PNR or Ticket based
- Process and account for all electronic transactions including fees and vouchers
- Triangulated Revenue Matching
- SOX/GAAP/IFRS

Technical Fits any Airline
- Any to Any: Technology – Airline - Operation
- COTS solution using customizable architecture
- Browser based infrastructure
